

AHMAD ANSAR

Cybersecurity Student | Systems, Networking & Security

Greater Boston, MA | ahmad@ahmadansar.me
ahmadansar.me | [linkedin.com/in/ahmadansar](https://www.linkedin.com/in/ahmadansar) | github.com/ahmad-ansar

PROFILE

Cybersecurity student at Wentworth Institute of Technology building toward security engineering through hands-on work in Linux hardening, network analysis, and systems administration. Brings early enterprise security experience from State Street and is open to co-ops and internships across IT, infrastructure, networking, and security.

EDUCATION

Wentworth Institute of Technology | Boston, MA

Expected 2029

Bachelor of Science in Cybersecurity

Selected Coursework: Computer Science I and II, Introduction to Networks, Security Principles, Discrete Mathematics, Engineering Physics I

TECHNICAL SKILLS

Security & Networking: TCP/IP, subnetting, Wireshark, Cisco Packet Tracer, Lynis, UFW, OpenSSH

Systems & Tools: Linux, Ubuntu, VMware, VirtualBox, Raspberry Pi, Git/GitHub

Programming (coursework and labs): Java, Python, Bash

RELEVANT EXPERIENCE

State Street | Cybersecurity Intern

Nov 2024 - Feb 2025

North Quincy, MA

- Documented day-to-day workflows across multiple cybersecurity functions and researched unfamiliar security operations topics.
- Created onboarding documentation, short technical write-ups, and presentation slides; presented internship takeaways and recruiting recommendations to mentors.

101 Art Studio (YouthWorks) | Digital Operations & Social Media Intern

Jun 2025 - Aug 2025

Quincy, MA

- Organized media from three staff phones into a structured archive backed up to a 2 TB SSD and cloud storage.
- Wrote a standard operating procedure and trained staff on the repeatable archive and backup workflow.

Quincy Coders | Instructor and Web Support

Oct 2024 - Apr 2025

Quincy, MA

- Guided K-8 students through Scratch debugging during weekly sessions and supported small GitHub website updates, testing changes before publication.

SELECTED PROJECTS

Linux System Hardening with Lynis

Apr 2026

- Audited a SANS SIFT Ubuntu 20.04 workstation with Lynis; configured UFW, hardened SSH, enforced a PAM password policy, enabled unattended security updates, and disabled unused filesystem modules. Mapped changes to the CIA triad and documented before-and-after scans.

Traffic Flood Simulation & Packet Analysis

Nov 2025 - Dec 2025

- Built an isolated two-VM Ubuntu lab in VirtualBox, captured controlled test traffic in Wireshark, monitored system load, and documented rate limiting, monitoring, and filtering mitigations.

DeSci Clinical Trial Matcher Prototype

Oct 2025

- Co-built an MVP at EasyA x Stellar Harvard Hack-O-Ween that registered trial criteria and matched patient profiles on Stellar testnet for a live demonstration.

Raspberry Pi Home Lab

Aug 2026 - Present

- Maintain a rebuildable Debian lab for Linux administration, local DNS, patching, permissions, service management, and log review, separated from personal files.

TRAINING & RECOGNITION

- Google Cybersecurity Professional Certificate - in progress, expected Aug 2026.
- SkillsUSA District Cybersecurity Competition - 2nd place, Feb 2025; qualified for the Massachusetts State Leadership and Skills Conference.
- Massachusetts Alliance for Early College Student Advisory Council - selected 1 of 12 students statewide to represent more than 4,000 Early College students.
